## PROFILE

I am pursuing a bachelor's degree in computer science with a business administration minor at Jacksonville State University. I have acquired programming expertise in C, C++, Python, HTML, CSS, JavaScript and more. I am actively participating in student organizations like International House and [IEEE.org](https://www.ieee.org/), showing ability to work in teams. With my passion in computer science & business administration, I aim to leverage this internship experiences to establish my career in a software develop and business administration.
